

84. (New) The process of Claim 76 wherein an adhesive layer is precoated on the positive photoresist and laminated onto the array of microcups.

85. (New) The process of Claim 83 wherein said adhesive is developable by the developer of the positive photoresist.

86. (New) The process of Claim 84 wherein said adhesive is developable by the developer of the positive photoresist.

87. (New) The process of Claim 76 wherein color filters are laminated or coated onto the display.

88. (New) The process of Claim 87 wherein said color filters are red, green or blue.

REMARKS

In the Office Action, the Examiner requires restriction of the claims to one of the following Groups:

Group I Claims 1-13, which are drawn to a liquid crystal device; and

Group II Claims 14-46, which are drawn to a method for making a liquid crystal device. The Applicants believe that Claims 43-46 should be in Group I, because they are drawn to a liquid crystal device.

The Applicants have cancelled all the claims and added new Claims 47-88. For the Examiner's reference, new Claims 47-88 are based on the Group II Claims 14-43 originally filed, thus, the new claims are supported by the application as filed. The new claims have been added to clean up the form of the claims as originally filed and place them in condition for examination. No new matter has been added by the amendment.

The Group I Claims (Claims 1-13 and 43-46) are cancelled from the present application without prejudice to future prosecution in a divisional application, which is to be filed later.

Should the Examiner believe that any other issues are outstanding, Applicants invite the Examiner to contact Ms. Ping Chow (Reg. No. 30,740) at (650) 324-7078.

Respectfully submitted,

Date: February 27, 2003
